

uvex fury™: Serious protection and comfort

The **uvex fury™** protective eyewear from **uvex**. Integrating the fit of a goggle into a spectacle, the **uvex fury** is the most unique, frameless protective eyewear available today.

The lens of the **uvex fury**, taken from the design of our new **uvex spitfire™** spectacle, is cushioned against the face by a soft, replaceable, flame resistant foam. This provides a close-to-the-face fit that is critical in windy, dirty and dusty work environments.

The **uvex fury** may be the most comfort-

able protective eyewear you will ever wear with a spectacular field of vision.

Assuring a great fit, the 14mm fabric elastic headband can be easily adjusted. The lens inclination system allows workers to adjust the lens for a customized fit.

The **uvex fury** comes with exclusive **uvex-treme™** anti-fog, anti-static, anti-scratch, and anti-UV lens coating on the replaceable unilens.

Not for chemical splash.

uvex fury:
Serious protection and comfort

Meets ANSI Z87.1-1969 for spectacles. CSA approval pending.

Made in the U.S.A.

uvex®

Beats Everything in Sight

The uvex fury. A unique hybrid of protective eyewear that combines the fit of a goggle with the styling of a spectacle. The uvex fury was designed
