Ultra-dura® Anti-Scratch Coating

**Uvextreme
Anti-Fog**
on the inside
provides anti-fog
protection near
your hard-
working eyes.

**Ultra-dura
Anti-Scratch**
on the outside adds
up to **3X more life**
to your lenses by
protecting against
harsh elements.

2 Uvex Dura-streme Technology

Two Coatings — One Lens That's Dura-streme™ Technology

Ultra-dura® anti-scratch coating on the outside.
It's simply made of tougher stuff.

Uvex Ultra-dura is one of the toughest coatings in the world. Permanently bonded to the lens, it won't rub or wear off, and is highly scratch-resistant. It's ultra-resistant to many chemicals, too.

Uvextreme® anti-fog coating on the inside for your extremes.

Some anti-fog coatings absorb and release moisture. Some repel it. Uvextreme does both. Which means when the temperature and humidity spike, Uvextreme keeps you seeing clearly, even under extreme conditions.

Dura-streme option is available on Uvex Ambient™ and Uvex Seismic™ safety eyewear and the Uvex Stealth® Goggle and Genesis® Family styles.

For situations where physical exertion is just a part of the job, where heat, humidity, mist, sand, dust, and chemicals are environmental factors, Dura-streme technology provides the protection you need. It's not disposable safety eyewear, it's indispensable. So good, workers will not only wear it, they'll keep a close eye on it too.

Go Ahead
**Take A
Nail To**

(But, That's Just The Beginning)

Now Breathe On It And See What Happens

With Uvex Dura-streme™ Technology, your anti-fog lenses last up to

3x* Longer

Go ahead. Take your fingernail to the outside of the lens. It won't scratch or scuff. Breathe on the inside. It won't fog up.

That's Dura-streme Technology from Uvex.

With a tough, permanent Ultra-dura® anti-scratch coating on the outside, and Uvextreme® anti-fog coating on the inside, your anti-fog lenses last up to 3x longer and offer wearers unique protection.

*Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application.

Uvex® Lens Coating Chemical Resistance

The Chemical Resistance Chart below will help to determine the preferred coating for environments where workers are subject to chemical exposure.

CHEMICAL RESISTANCE CHART

CHEMICAL	UD	XTR	DURA-STREME/ UD EXTERNAL	DURA-STREME/ XTR INTERNAL
Acetone	Y	N	Y	N
Ammonia 10%	Y	Y	Y	Y
Benzene	Y	N	Y	N
Butanol	Y	Y	Y	Y
Butyl Acetate	Y	N	Y	N
Carbon Tetrachloride	Y	Y	Y	Y
Cyclohexanol	Y	N	Y	N
Diethylether	Y	Y	Y	Y
Ethanol	Y	Y	Y	Y
Ethylene Glycol	Y	Y	Y	Y
Formic Acid 30%	Y	Y	Y	Y
Gasoline (Normal)	Y	Y	Y	Y
Gasoline (Super)	Y	N	Y	N
Hydrofluoric Acid	•	Y	•	Y
Hydrochloric Acid 20%	Y	Y	Y	Y
Isopropyl Alcohol	Y	•	Y	•
Methanol	Y	Y	Y	Y
Methylene Chloride	Y	N	Y	N
Potassium Carbonate 30%	Y	Y	Y	Y
Sodium Carbonate 30%	Y	Y	Y	Y
Sulfuric Acid 50%	Y	Y	Y	Y
Toluene	Y	N	Y	N
Trichloroethylene	Y	N	Y	N
Xylene	Y	N	Y	N

KEY | Y = Resistant | • = Limited resistance | N = Not resistant

Uvex® Lens Coating Options

Uvex has developed proprietary coatings to meet the demands of even the most challenging work environments.

Uvextreme® anti-fog coating (XTR) offers superior performance under the most extreme conditions and will not wear off after repeated cleanings. It is permanently bonded to the lens which helps it retain its anti-scratch, anti-static and UV protection properties.

Ultra-dura® hard coat (UD), one of the toughest siloxane-based coatings in the world, is also permanently bonded to the lens and offers superior scratch and chemical resistance.

Uvex Dura-streme™ technology combines the benefits of these industry leading anti-fog and hard coats onto one lens. While the advanced anti-fog properties of Uvextreme help keep the interior of the lens clear from fogging, the rugged properties of Ultra-dura hard coat protect the exterior of the lens from scuffs and scratches, adding up to **3x more life to lenses.**
